

## **Postdoctoral Fellowship in Clinical Child Psychology Didactics and Postdoc Seminar Sample Schedule**

Didactic presentations and seminars are planned to complement direct experiential training to support development of advanced competencies. Topics align with one or more identified competencies, in the areas of health services psychology, program-specific, or specialty competencies. All didactic presentations (not only those with a specific diversity focus) include content that demonstrates the topic's application to diverse populations and/or the topic's relevance for antiracism, equity, or social justice. Topics may change from year to year to ensure the most current research is reflected in the curriculum, and new topics may be added in response to fellow interests/requests and other current events.

The list below is not exhaustive and is intended to provide an example of topics that may be presented, organized by the primary competency for each topic.
