

Better Together

That's Integrated Health

We've created a caring environment for foster families that brings together hope, health and healing all under one roof. All of your healthcare appointments are located in one welcoming place, making us the only integrated foster care clinical program in North Texas.

What is integrated care?

Integrated care is a team-based, comprehensive and seamless healthcare process. Your child will see a primary care provider and a behavioral health provider at the same visit, ensuring that everyone has a shared understanding of your child and his or her needs.

Our foster families value the collaborative care they find here, telling us it helps them gain a better understanding, makes good use of their time, and is "a win/win with benefits for the kids and for parents."

Bringing together hope, health and healing

Your family is supported through an integrated program that was created with your child's physical and mental health in mind. Your team — experts uniquely positioned to work with traumatized children and their caregivers — will customize an integrated treatment plan and care for your family from the initial visit through all follow-up appointments.

- **Hope** We designed our center from the ground up to address the complex needs of foster families, including multiple exam and therapy rooms that allow foster parents to speak privately with their providers while viewing their children through an observation window. Together we can help you envision a bright future.
- **Health** Your visits include introductions to your integrated team, which may include primary care pediatricians or pediatric nurse practitioners, psychologists, psychiatrists, therapists, early childhood specialists and Child Protective Services healthcare liaisons. At a single appointment, you may meet with several health professionals based on your family's needs.
- **Healing** Your team remains the same, providing continuity of care and family resources that may include well visits, same-day sick visits and parent education.
