To arrange a neonatal or pediatric transport, call 888-730-DOCS.

Neonatal and Pediatric Specialty Transport

Neonatal | Pediatric | HROB

Winner of the 2013 Association of Air Medical Services Neonatal and Pediatric Award of Excellence
Winner of the 2016 EMS for Children Crew of the Year Award
Winner of the 2018 AAMS Transport Mechanic’s Award of Excellence

All modes of transport equipped for Extracorporeal Membrane Oxygenation (ECMO).
### Program Overview

Staffed with a dedicated caring crew 24 hours a day, Transport Services coordinates all aspects of transfers and transports. From the time a transport is requested, our team begins to mobilize, ensuring that every step is evaluated to provide ongoing medical advice while the transport team evolves.

The Children’s Health Transport Services has the most specialized, licensed teams in the country to receive the Commission on Accreditation of Medical Transport Systems (CAMTS) accreditation in all three modes of transport – ground, helicopter and fixed-wing. Critical care nurses, registered respiratory therapists and paramedics team availability to efficiently and effectively meet the most demanding, time-sensitive situations.

Our 12 neonatal/pediatric-equipped ambulances, one Citation Encore jet and a variety of transport vehicles to provide an urgent and appropriate response, including: regional, national and international patient transport. We’re by your side® to provide high-quality care including:

- Specially equipped vehicles and aircrafts that can accommodate critical care needs including nitric oxide, high-frequency, jet ventilation and extracorporeal membrane oxygenation (ECMO) available.
- Oxygen, inhaled nitric oxide (iNO) available on all modes of transport.
- Trained in Association of Women’s Health, Obstetric and Neonatal Nurses (AWHONN) guidelines and are prepared to handle a wide variety of patient needs throughout the transport. The team is supported by outreach and follow-up programs to monitor long-term outcomes.
- Board-certified neonatologists and pediatricians available on all modes of transport. The Children’s Health Access Center is staffed with communication specialists 24 hours a day, seven days a week. When a treatment facility needs to transfer a neonate for specialized care, our Transport Services carefully select the right transport vehicle. Our Specialty Transport team provides multidisciplinary care and can manage a wide variety of diagnoses and complications throughout the transport. The team is supported by outreach and follow-up programs to monitor long-term outcomes.
- Experience with high-frequency jet ventilation and inhaled nitric oxide (iNO).
- Utilizes ventilators capable of multiple modes of ventilation that are appropriate for neonatal, pediatric and obstetrical (HROB) patients.
- Transports between hospitals and airports in the Dallas-Fort Worth area. We're by your side® to provide high-quality care including:
