

2021 Standout Statistics

Heart Transplant

- **19** heart transplants
- **92.87%** three-year graft survival rate
- **100%** of the transplant coordinators are nationally certified

Cath/MRI

- **1,062** cardiac MRIs
- **620** catheterizations
- **30** hybrid MRI/Cath procedures

Specialized Teams

- **1,409** cardiovascular anesthesiology cases
- **39** adult congenital heart disease surgeries
- **80** neurodevelopmental assessments

Cardiac Intensive Care Unit

- **27%** reduction in surgical site infections (SSI)
- **37%** reduction of cardiac arrests
- **65%** reduction in unplanned readmissions within 48 hours of transferring to acute care cardiology unit

Fetal Heart

- **1,218** fetal evaluations
- **13** locations available for fetal evaluations
- **30** fetal specialists

Cardiothoracic Surgery

- **8** ventricular assist device (VAD) implants
- **526** surgeries, including UT Southwestern and Parkland locations
- **113** complex surgeries*, including UT Southwestern and Parkland locations

*STAT 4 (96), STAT 5 (13)

Echocardiograms

- **32,827** echocardiograms
- **25** locations
- **573** transesophageal echocardiograms

Inpatient Cardiology

- **1,267** inpatient admissions
- **55%** reduction in central line-associated bloodstream infection (CLABSI)
- **44%** of patients discharged less than 4 days

Ambulatory Cardiology

- **34,587** patients seen
- **24** locations
- **90%** likely to recommend (Net Promoter Score)
